COMMENTARIES

2106 Topical Antiseptics and the Skin Microbiota
J Claesen

2108 Automated Classification of Skin Lesions: From Pixels to Practice
A Narla, B Kuprel, K Sarin, R Novoa and J Ko

ORIGINAL ARTICLES

Appendages

2111 Macrophages Promote Wound-Induced Hair Follicle Regeneration in a CX3CR1- and TGF-β1-Dependent Manner
W Rahmani, Y Liu, NL Rosin, A Kline, E Raharjo, J Yoon, JA Stratton, S Sinha and J Biernaskie

Autoimmunity/Autoinflammation

2123 Deregulated PSGL-1 Expression in B Cells and Dendritic Cells May Be Implicated in Human Systemic Sclerosis Development

Cell Biology

2133 EphA2 Transmembrane Domain Is Uniquely Required for Keratinocyte Migration by Regulating Ephrin-A1 Levels
R Ventrella, N Kaplan, P Hoover, BE Perez White, RM Lavker and S Getsios

Clinical Research: Epidemiology

2144 Sun-Protection Behavior, Pubertal Development and Menarche: Factors Influencing the Melanocytic Nevi Development—The Results of an Observational Study of 1,512 Children
V De Giorgi, A Gori, A Greco, I Savarese, B Alfaioli, M Gazzini, S Rossari, F Papi, F Scarfi, A Janowska, A D’Errico, L Salvati, P Covarelli and S Gandini
A Garg, S Wertenteil, R Baltz, A Strunk and N Finelt

Clinical Research: Pathophysiology
2157 The Major Orphan Forms of Ichthyosis Are Characterized by Systemic T-Cell Activation and Th-17/Tc-17/Th-22/Tc-22 Polarization in Blood
T Czarnowicki, H He, A Leonard, K Malik, S Magidi, S Rangel, K Patel, K Ramsey, M Murphrey, T Song, Y Estrada, H-C Wen, JG Krueger, E Guttmann-Yassky and AS Paller

Clinical Research: Therapeutics
2168 Ixekizumab Pharmacokinetics, Anti-Drug Antibodies, and Efficacy through 60 Weeks of Treatment of Moderate to Severe Plaque Psoriasis
K Reich, K Jackson, S Ball, S Garces, L Kerr, L Chua, TM Muram and A Blauvelt

Inflammation
2174 IL-21 Attenuates FITC-Induced Contact Hypersensitivity Response via Regulation of Dendritic Cell Function
H Nara, M Komatsu, Y Tekeda, A Araki, N Akhter and H Asao

2185 Eosinophils Accelerate Pathogenesis of Psoriasis by Supporting an Inflammatory Milieu that Promotes Neutrophil Infiltration
HJ Kim, JY Roh and Y Jung

2195 Exacerbated Immune Complex-Mediated Vascular Injury in Mice with Heterozygous Deficiency of Aryl Hydrocarbon Receptor through Upregulation of Fcγ Receptor III Expression on Macrophages
R Nakajima, T Miyagaki, S Morimura, T Fukasawa, T Oka, A Yoshizaki, M Sugaya and S Sato

Melanocytes/Melanoma
2205 Downregulated TRPV1 Expression Contributes to Melanoma Growth via the Calcineurin-ATF3-p53 Pathway
Y Yang, W Guo, J Ma, P Xu, W Zhang, S Guo, L Liu, J Ma, Q Shi, Z Jian, L Liu, G Wang, T Gao, Z Han and C Li

2216 Mutated MITF-E87R in Melanoma Enhances Tumor Progression via S100A4

Microbiome/Microbiology
2224 Patients with Atopic Dermatitis Colonized with Staphylococcus aureus Have a Distinct Phenotype and Endotype

2234 Antiseptic Agents Elicit Short-Term, Personalized, and Body Site–Specific Shifts in Resident Skin Bacterial Communities
AJ SanMiguel, JS Meisel, J Horwinski, Q Zheng, CW Bradley and EA Grice

Photobiology
2244 Fractional Sunburn Threshold UVR Doses Generate Equivalent Vitamin D and DNA Damage in Skin Types I–VI but with Epidermal DNA Damage Gradient Correlated to Skin Darkness
BB Shih, MD Farrar, MS Cooke, J Osman, AK Langton, R Kift, AR Webb, JL Berry, REB Watson, A Vail, FR de Gruijl and LE Rhodes
Wound Healing

2253 MiR-31 Mediates Inflammatory Signaling to Promote Re-Epithelialization during Skin Wound Healing
J Shi, X Ma, Y Su, Y Song, Y Tian, S Yuan, X Zhang, D Yang, H Zhang, J Shuai, W Cui, F Ren, MV Plikus, Y Chen, J Luo and Z Yu

2264 Microbial Host Interactions and Impaired Wound Healing in Mice and Humans: Defining a Role for BD14 and NOD2
H Williams, L Campbell, RA Crompton, G Singh, BJ McHugh, DJ Davidson, AJ McBain, SM Cruickshank and MJ Hardman

LETTERS TO THE EDITOR

2275 Interpretation of the Outputs of a Deep Learning Model Trained with a Skin Cancer Dataset
SS Han, W Lim, MS Kim, I Park, GH Park and SE Chang

2277 Automated Dermatological Diagnosis: Hype or Reality?
C Navarrete-Dechent, SW Dusza, K Liopyris, AA Marghoob, AC Halpern and MA Marchetti

2280 The Stenosis of Cerebral Arteries and Impaired Brain Glucose Uptake by Long-Lasting Inflammatory Cytokine Release from Dermatitis Is Rescued by Anti-IL-1 Therapy

2283 ADAM17-Deficient Mice Model the Transcriptional Signature of Human Atopic Dermatitis
T Woodring, T Kobayashi, D Kim and K Nagao

2286 Serum Soluble CD48 Levels as a Prognostic Marker in Mycosis Fungoides and Sézary Syndrome
T Oka, T Miyagaki, N Takahashi, R Nakajima, H Kamijo, H Suga, Y Asano, M Sugaya and S Sato

2288 Physician Skin Checks before the Diagnosis of Melanoma Correlate with Tumor Characteristics
CM Olsen, N Pandeya, BS Thompson, JC Dusingize, AC Green, RE Neale and DC Whiteman, for the QSkin Study

COVER IMAGE
Czarnowicki and colleagues characterized functionally distinct T cell subsets in the peripheral blood of patients with ichthyoses and characterized associations with clinical features. The existence of patient subpopulations manifested by similar immunophenotypes and clinical features suggests the possibility of differential responsiveness to existing and newly developed targeted biologics. See the article on page 2157 for details.
