**038**

A distinct Th17 cell subset producing IL-26 promotes expression of IL-17 in the skin through induction of TGF-β.

Ll Domínguez1, S Ferrer, C Trubieu and M Gilliet Dermatology, University Hospital Lausanne CHUV, Lausanne, Switzerland

**039**

Transcriptome profiling of laminin α3 inhibited primary keratinocytes reveals the regulatory effect of laminin α3-binding on keratinocyte differentiation

B Lu, J Li, E Kowalski, D Knebel and K Amber Dermatology, Univ of Illinois at Chicago, Park Ridge, IL and MO Hammes1, 2, 3

1 University of Muenster, Muenster, Germany, 2 Universitaetsspital Bern, Bern, Switzerland, 3 Dermatology, Inselspital, Bern, Switzerland

**040**

Pathogenicity of anti-desmoglein 3 in IgA1 autoantibodies is Fe-dependent in IgA pemphigus

S Emtenani1, 2, J Johns1, A Recke2, L Komorowski1, C Probst1, JE Hundt1, T Hashimoto2, D Gilliet1,2
