ORIGINAL ARTICLES
Barrier Function
2080 Responses of Reconstructed Human Epidermis to Trichophyton rubrum Infection and Impairment of Infection by the Inhibitor PD169316
E Faway, L Cambier, E De Vuyst, C Evrard, M Thiry, C Lambert de Rouvroit, B Mignon and Y Poumay

Clinical Research
2090 Validation and Interpretation of Short Form 12 and Comparison with Dermatology Life Quality Index in Atopic Dermatitis in Adults
JI Silverberg, JM Gelfand, DJ Margolis, M Boguniewicz, L Fonacier, MH Grayson, PY Ong, ZC Chiesa Fuxench and EL Simpson

Clinical Research: Pathophysiology
2098 Dysregulation of Akt-FOXO1 Pathway Leads to Dysfunction of Regulatory T Cells in Patients with Psoriasis
B Li, J Lei, L Yang, C Gao, E Dang, T Cao, K Xue, Y Zhuang, S Shao, D Zhi, J Hao, L Jin, P Qiao, W Ouyang and G Wang

2108 Gluten Challenge Induces Skin and Small Bowel Relapse in Long-Term Gluten-Free Diet–Treated Dermatitis Herpetiformis
E Mansikka, K Hervonen, K Kaukinen, T Ilus, P Oksanen, K Lindfors, K Laurila, M Hietikko, J Taavela, J Jernman, P Saavalainen, T Reunala and T Salmi

Clinical Research: Therapeutics
2115 Cultured Epidermal Autografts from Clinically Revertant Skin as a Potential Wound Treatment for Recessive Dystrophic Epidermolysis Bullosa
Connective Tissue/Matrix Biology

2125 Effects of Parvovirus B19 In Vitro Infection on Monocytes from Patients with Systemic Sclerosis: Enhanced Inflammatory Pathways by Caspase-1 Activation and Cytokine Production
K Zakrzewska, R Arvia, MG Torcia, AM Clemente, M Tanturli, G Gastronovo, G Sighinolfi, D Giuggioli and C Ferri

2134 Nephrogenic Systemic Fibrosis Is Mediated by Myeloid C-C Chemokine Receptor 2
C Do, V Drel, C Tan, D Lee and B Wagner

2144 Intervention of Inflammatory Monocyte Activity Limits Dermal Fibrosis
J Haub, N Roehrig, P Uhrin, G Schabbauser, D Eulberg, F Melchior, F Shahnhe, HC Probst, C Becker, K Steinbrink and VK Raker

Genetics/Genetic Disease

2154 A Monoallelic Two-Hit Mechanism in PLCD1 Explains the Genetic Pathogenesis of Hereditary Trichilemmal Cyst Formation
S Hörer, S Marrakchi, FPW Radner, G Zolles, L Heinz, TO Eichmann, C Has, P Salavei, N Maftoudh, H Turki, AD Zimmer and J Fischer

Inflammation

2164 Silencing of PD-L2/87-DC by Topical Application of Small Interfering RNA Inhibits Elicitation of Contact Hypersensitivity
E Furusawa, T Ohno, S Nagai, T Noda, T Komiyama, K Kobayashi, H Hamamoto, M Miyashin, H Yokozeki and M Azuma

2174 Oxidative Stress—Induced HMGB1 Release from Melanocytes: A Paracrine Mechanism Underlying the Cutaneous Inflammation in Vitiligo
T Cui, W Zhang, S Li, X Chen, Y Chang, X Yi, P Kang, Y Yang, J Chen, L Liu, Z Jian, K Li, G Wang, T Gao, P Song and C Li

2185 IL-33—Induced Atopic Dermatitis—Like Inflammation in Mice Is Mediated by Group 2 Innate Lymphoid Cells in Concert with Basophils
Y Imai, K Yasuda, M Nagai, M Kusakabe, M Kubo, K Nakanishi and K Yamanishi

Lymphoma/Lymphoproliferative Disorders

2195 Acquired N-Linked Glycosylation Motifs in B-Cell Receptors of Primary Cutaneous B-Cell Lymphoma and the Normal B-Cell Repertoire
MT Koning, E Quinten, WH Zoutman, SM Kielbasa, H Mei, CAM van Bergen, P Jansen, RD Vergroesen, R Willemze, MH Vermeer, CP Tensen and H Veelken

Wound Healing

2204 Tumor Endothelial Marker 1 (TEM1/Endosialin/CD248) Enhances Wound Healing by Interacting with Platelet-Derived Growth Factor Receptors

LETTERS TO THE EDITOR

2215 Gender Equity Improving among Award Winners and Leaders at the Society for Investigative Dermatology
N Shukla, MR Wehner, L Morrison, HB Naik and E Linos

2217 Diversity is Excellence: Initiatives in the Society for Investigative Dermatology to Broaden Participation
V Horsley, D Glass, R Minnillo, R Gallo, P Cruz and NL Ward

2219 Exophilin-5 Supports Lysosome-Mediated Trafficking Required for Epidermal Differentiation
CL Monteleon, IY Lee and TW Ridky

2223 Chronic Pruritus Severity and QoL Impact on Healthcare Utilization among Veterans: A National Survey
SC Chisolm, H Yeung, K Peloza and SC Chen
2225 Abnormal Glucocorticoid Synthesis in the Lesional Skin of Erythematotelangiectatic Rosacea
JS Hong, S Han, JS Lee, C Lee, MH Choi, YK Kim, EY Seo, JH Chung and S Cho

2228 Major Differences in Expression of Inflammatory Pathways in Skin from Different Body Sites of Healthy Individuals
E Del Duca, AB Pavel, C Dubin, T Song, EB Wallace, X Peng, YD Estrada, H Xu, C Maari, C Jack, E St-Cyr Proulx, JG Krueger, R Bissonnette and E Guttman-Yassky

2232 Defining a Minimal Effective Serum Trough Concentration of Secukinumab in Psoriasis: A Step toward Personalized Therapy

2235 An Animal Model of Cutaneous Cyst Development Enables the Identification of Three Quantitative Trait Loci, Including the Homologue of a Human Locus (TRICY1)
I Cosgarea, B Koelsch, C Fischer, KG Griewank, L van den Berg, A Kutritz, D Schadendorf and A Kindler-Röhrborn

2238 Malta (MYH9 Associated Elastin Aggregation) Syndrome: Germline Variants in MYH9 Cause Rare Sweat Duct Proliferations and Irregular Elastin Aggregations
E Fewings, M Ziemer, K Hörttnagel, K Reichert, A Larionov, J Redman, MA Goldgraben, A Pepler, T Hearn, H Firth, T Ha, J Schaller, DJ Adams, E Rytina, M van Steensel and M Tischkowitz

2242 Enhanced Intrinsic Skin Aging in Nephropathic Cystinosis Assessed by High-Definition Optical Coherence Tomography
KRP Veys, MA Elmonem, F Dhaenens, M Van Dyck, MMCH Janssen, EAM Cornelissen, K Hohenfellner, A Reda, P Quatresooz, B van den Heuvel, MALM Boone and E Levtchenko

2245 Where Is Itch Represented in the Brain, and How Does it Differ from Pain? An Activation Likelihood Estimation Meta-Analysis of Experimentally-Induced Itch
CA Roberts, T Giesbrecht, A Stancak, N Fallon, A Thomas and TC Kirkham

COVER IMAGE

In a transgenic mouse model in which IL-33 is constitutively overproduced by keratinocytes, Imai and colleagues show that AD-like inflammation in skin is dependent on basophils and ILC2s. Basophil-derived IL-4 may be a key mediator. Please see the article on page 2185 and the relevant commentary on page 2077 of this issue for details.
