EDITORIAL
1373 Clinical Snippets
1374 Editors’ Picks

JID CONNECTOR
1375 Research Techniques Made Simple: Delivery of the CRISPR/Cas9 Components into Epidermal Cells
   H Shi, JPH Smits, EH van den Bogaard and MG Brewer

   e65 SnapshotDx Quiz: June 2021
   AK Joseph and BF Chong

   e71 Cells to Surgery Quiz: June 2021
   MN Nemeh and RI Nijhawan

COMMENTARIES
1382 The Hyperglycemia Stranglehold Stifles Cutaneous Epithelial–Mesenchymal Plasticity and Functional Wound Closure
   CK Sen and S Roy

1385 The Enigma of AHR Activation in the Skin: Interplay among Ligands, Metabolism, and Bioavailability
   EH van den Bogaard and GH Perdew

PERSPECTIVE
1389 Deciphering Melanoma Cell States and Plasticity with Zebrafish Models
   J Travnickova and EE Patton

REVIEW
1395 Platelets: Underestimated Regulators of Autoinflammation in Psoriasis
   F Herster, S Karbach, M Chatterjee and ANR Weber

ORIGINAL ARTICLES

   Autoimmunity/Autoinflammation
1404 NLRP3 Inhibition Ameliorates Severe Cutaneous Autoimmune Manifestations in a Mouse Model of Autoimmune Polyendocrinopathy-Candidiasis-Ectodermal Dystrophy–Like Disease
   F Zhu, J Willette-Brown, J Zhang, EMN Ferre, Z Sun, X Wu, MS Lionakis and Y Hu

   Barrier Function
1416 Isosorbide Di-(Linoleate/Oleate) Stimulates Prodifferentiation Gene Expression to Restore the Epidermal Barrier and Improve Skin Hydration
   K Bojanowski, WR Swindell, S Cantor and RK Chaudhuri

   Cell Biology
1428 Epidermal SR-A Complexes Are Lipid Raft Based and Promote Nucleic Acid Nanoparticle Uptake
   Q Song, X-Q Wang, TR Holmes, M Bonkowski, EW Roth, A Ponedal, C Mirkin and AS Paller

1438 High Glucose Restraint of Acetylcholine-Induced Keratinocyte Epithelial-Mesenchymal Transition Is Mitigated by p38 Inhibition
   MWY Tan, WR Tan, ZQ Kong, JH Toh, WKJ Wee, EML Teo, HS Cheng, X Wang and NS Tan
1450 Diversity of Mechanisms Underlying Latent TGF-β Activation in Recessive Dystrophic Epidermolysis Bullosa
E Akasaka, S Kleiser, G Sengle, L Bruckner-Tuderman and A Nyström

Clinical Research

1461 Granulysin-Based Lymphocyte Activation Test for Evaluating Drug Causality in Antiepileptics-Induced Severe Cutaneous Adverse Reactions
M-T Chu, C-W Wang, W-C Chang, C-B Chen, W-H Chung and S-I Hung

Clinical Research: Pathophysiology

1473 IFN-γ–Stimulated Apoptotic Keratinocytes Promote Sclerodermatous Changes in Chronic Graft-Versus-Host Disease
A Saito, Y Ichimura, N Kubota, R Tanaka, Y Nakamura, Y Fujisawa, R Watanabe, Y Ishitsuka, M Fujimoto and N Okiyama

Connective Tissue/Matrix Biology

1482 Function-Blocking RHAMM Peptides Attenuate Fibrosis and Promote Antiﬁbrotic Adipokines in a Bleomycin-Induced Murine Model of Systemic Sclerosis
KY Wu, S Kim, VM Liu, A Sabino, K Minkhorst, A Yazdani and EA Turley

Genetics/Genetic Disease

1493 Causal Relationship and Shared Genetic Loci between Psoriasis and Type 2 Diabetes through Trans-Disease Meta-Analysis
MT Patrick, PE Stuart, H Zhang, Q Zhao, X Yin, K He, X-j Zhou, NN Mehta, JJ Voorhees, M Boehnke, JE Gudjonsson, RP Nair, SK Handelman, JT Elder, DJ Liu and LC Tsoi

Immunity

1503 DOCK8 Expression in Regulatory T Cells Maintains their Stability and Limits Contact Hypersensitivity
H Wilkie, E Janssen, JM Leyva-Castillo and RS Geha

1512 Selective Expansion of Double-Negative iNKT Cells Inhibits the Development of Atopic Dermatitis in Vα14 TCR Transgenic NC/Nga Mice by Increasing Memory-Type CD8+ T and Regulatory CD4+ T Cells
HJ Park, SW Lee, S-H Park, L Van Kaer and S Hong

1522 Galectin-1 Expression in CD8+ T Lymphocytes Controls Inflammation in Contact Hypersensitivity
R Castillo-González, D Cibrian, N Fernández-Gallego, M Ramírez-Huesca, ML Saiz, MN Navarro, M Fresno, H de la Fuente and F Sánchez-Madrid

Inflammation

1533 Cigarette Smoke Underlies the Pathogenesis of Palmoplantar Pustulosis via an IL-17A–Induced Production of IL-36γ in Tonsillar Epithelial Cells
K Kobayashi, R Kamekura, J Kato, S Kamiya, T Kamiya, K Takano, S Ichimiya and H Uehara

1542 OVOL1 Regulates Psoriasis-Like Skin Inflammation and Epidermal Hyperplasia
P Sun, R Yu, M Dragan, D Haensel, G Gutierrez, Q Nguyen, E Greenberg, Z Chen, J Wu, S Atwood, E Pearlman, Y Shi, W Han, K Kessenbrock and X Dai

1553 CYP1A1 Enzymatic Activity Influences Skin Inflammation Via Regulation of the AHR Pathway
M Kyoreva, Y Li, M Hoosenally, J Hardman-Smart, K Morrison, I Tosi, M Tolaini, G Barinaga, B Stockinger, U Mrowietz, FO Nestle, CH Smith, JN Barker and P Di Meglio
Melanocytes/Melanoma

1564 ARID2 Deficiency Correlates with the Response to Immune Checkpoint Blockade in Melanoma
T Fukumoto, J Lin, N Fatkhutdinov, P Liu, R Somasundaram, M Herlyn, R Zhang and C Nishigori

Wound Healing

1573 Transient High Glucose Causes Persistent Vascular Dysfunction and Delayed Wound Healing by the DNMT1-Mediated Ang-1/NF-κB Pathway
J Zhao, S Yang, B Shu, L Chen, R Yang, Y Xu, J Xie, X Liu and S Qi

LETTERS TO THE EDITOR

1585 T-Cell Response in Dermatitis Herpetiformis: May Epidermal Transglutaminase Play a Role in Predicting Clinical Relapse?
E Antiga, R Maglie and P Fabbri

1586 Cutaneous Gene Expression in Primates with Itch
LA Nattkemper, K Fourzali and G Yosipovitch

1588 Staphylococcal Hemolytic Potential Is Correlated with Increased Severity of Atopic Dermatitis in Children and Young Adults
EA Gurnee, M Xu, CJ Risener, K Lehman, K Nelson, RA Swerlick and CL Quave

1592 The Selection Process for a Web-Based Application to Measure Patient-Reported Outcomes Following the Example of the TREAT NL Registry
R de Groot, AL Bosma, R Cornet and PI Spuls

1596 Hereditary Mucoepithelial Dysplasia and Autosomal-Dominant IFAP Syndrome Is a Clinical Spectrum Due to SREBF1 Variants
C Murase, T Takeichi, T Nomura, T Ogi and M Akiyama

1598 Three-Dimensional Telomeric Fingerprint of Mycosis Fungoides and/or Sézary Syndrome: A Pilot Study
MN Bienz, T Petrogiannis-Haliotis, K Pehr, N Benlimame, S Mai and H Knecht

1601 Lack of Systemic Absorption of Topical Mechlorethamine Gel in Patients with Mycosis Fungoides Cutaneous T-Cell Lymphoma
C Querfeld, LJ Geskin, EJ Kim, JJ Scarisbrick, P Quaglino, E Papadavid, JT Angello and PL Ortiz-Romero

1604 Cutaneous T-Cell Lymphoma Skin Microbiome Is Characterized by Shifts in Certain Commensal Bacteria but not Viruses when Compared with Healthy Controls
CP Harkins, MA MacGibeny, K Thompson, B Bubic, X Huang, I Brown, J Park, J-H Jo, JA Segre, HH Kong and S Rozati

1608 Topical Fluoxetine as a Potential Nonantibiotic Adjunctive Therapy for Infected Wounds
DJ Yoon, C Nguyen, MD Bagood, DR Fregoso, H-y Yang, AI Medina Lopez, RW Crawford, J Tran and RR Isseroff
Travnickova and Patton discuss the use of multidimensional approaches involving zebrafish models to gain insights into melanoma pathogenesis and therapy. See pages 1389–1394 for details.
